SECTION 6		Accidental release measures				

A. Personal precautions, protective equipment and emergency procedures	Clean up spills immediately, observing precautions in Protective Equipment section. Keep unnecessary and unprotected personnel from entering. Do not breathe dust/fume/gas/mist/vapours/spray. Wear protective gloves/protective clothing/eye protection/face protection.
B. Environmental precautions and protective procedures	Prevent entry to waterways
C. The methods of purification and removal	Absorb spills with inert material (e.g., dry sand or earth), then place in a chemical waste container.
	Absorb the liquid and scrub the area with detergent and water.
	Avoid release to the environment.
	Collect spillage.
SECTION 7	Handling and storage
A. Precautions for safe handling	Obtain special instructions before use.
	Follow all MSDS/label precautions even after container is emptied because they may retain
	product residues.
	Avoid release to the environment.
	Please note that materials and conditions to avoid.
	Please work with reference to engineering controls and personal protective equipment.
	Do not handle until all safety precautions have been read and understood.
	Do not eat, drink or smoke when using this product.
	Wash the handling area thoroughly after handling.
B. Conditions for safe storage	Store locked up.
	Store in a closed container.
	Store in cool and dry place.
	Empty drums should be completely drained, properly bunged, and promptly returned to a
	drum control, or properly placed.
	Keep away from food and drinking water.

Copper	TWA 0.2mg/m ³ (fume)
	TWA 1mg/m ³ (metal dust)
Nickel	TWA insoluble inorganic compounds (NOS): 0.2 mg/m ³ (inhalable particulate matter)
	TWA elemental: 1.5 mg/m ³ (inhalable particluate matter)
Cobalt	TWA 0.02mg/m ³
Biological exposure index	* *
Cobalt	15 μg/L, End of shift at end of workweek

B. Appropriate engineering controls

Provide local exhaust ventilation system or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

C. Personal protective equipment

* Respiratory protection

Wear NIOSH or European Standard EN 149 approved full or half face piece (with goggles) respiratory protective equipment when necessary.

In case exposed to particulate material, the respiratory protective equipments as follow are recommended. ; facepiece filtering respirator or air-putifying respirator, high-efficiency particulate air(HEPA) filter media or respirator equipped with powered fan, filter media of use(dust, fume)

In lack of oxygen(< 19.6%), wear the supplied-air respirator or self-contained breathing apparatus.

* Eye protection	Wear safety goggles as follow if eye irritation or other disorder occur. - In case of gaseous state organic material: enclosed safety goggles - In case of vapour state organic material: safety goggles or breathable safety goggles - In case of particulate material: breathable safety goggles
* Hand protection	An eye wash unit and safety shower station should be available nearby work place. Wear appropriate protective gloves by considering physical and chemical properties of chemicals.
* Body protection	Wear appropriate protective clothing by considering physical and chemical properties of chemicals.

This Material Safety Data Sheet (SDS) is prepared according to the GHS (Globally Harmonized System of Classification and Labeling of Chemicals) standards of Korea.

This data does not guarantee product quality, but describes safety, health and environmental issues for handling under normal conditions. If the properties of the product are changed due to heating or processing according to the usage method, please check the additional safety and health information before use.

In addition, this information may be revised without prior notice, and materials can be provided through our website (www.poongsan.co.kr).
